

***Downrung* Skin Formula**

This is used to treat all types of skin infections and diseases, such as scabies, dermatitis, psoriasis, infected mosquito bites, infected acne, etc. It is not used for wounds unless they are infected. It is especially helpful for HIV patients in order to treat the many skin outbreaks and infections that are common.

(Dok) downruug (Marigold flowers)
Sulfur
Alum
Liquid topical antibiotic (commercial)
Vaseline

9 (large)
¼ inch square
¼ inch square
small amount
small amount

The flowers are ground into a powder and made moist by adding a small amount of topical antibiotic (usually one or two tablespoons). The sulfur and alum are then added and Vaseline is used to give the

consistency needed for good skin application.

This has also been used as part of the treatment for psoriasis.
